

PCI Compliance

If you receive and store credit card information, you are likely subject to PCI compliance regulations, and there are several cybersecurity controls and steps to take. Digicel Business Protect works with many organisations required to achieve and maintain PCI compliance. We regularly provide assessments, deploy solutions, add 24x7 security monitoring, and provide reporting to our PCI related clients.

HIPAA Compliance

HIPAA compliance does not have to be hard or incredibly expensive. Digicel Business Protect has extensive experience working with healthcare organisations, including hospitals, clinics, and business process outsourcers in the healthcare industry. Digicel Business Protect provides multiple SIEM solutions and related security services to help enable healthcare organisations to achieve HIPAA compliance efficiently.

ISO 27001

We have developed a flexible but detailed approach that has helped multiple organisations achieve certification. Based on our experience working with companies of all sizes, we have an established method of implementing ISO 27001 to fit your organisation.

GDPR

Digicel Business Protect respects customer and learner's rights to data privacy and protection and as such we have revised our internal policies, procedures, working practices to meet the requirements of the GDPR. We place a high priority on protecting and managing data in accordance with accepted standards and indeed helping our customers utilise our products and services to the same end.
