

Secure your Home, Business and Mobile Workforce for any device type and OS.

Service Overview

Your end users' machines, mobiles and server infrastructure are top targets for modern day cyber-attacks. Attacks are happening every minute of every day regardless of organisation size, vertical or location. Active and consistent monitoring of your endpoint protection solution is a must to identify threats early. With IT and Security teams under serious resource constraints SentinelOne and Lookout with Protect 360° provides an affordable and high integrity managed Advanced Endpoint (AEP).

Breach Detection	Deep Dive Forensics	Fast Recovery	Remediation
Root Analysis	Device Control	Rogue Visibility	Vulnerability Management
Threat Response	Automation	Hunt MITRE ATT&CK	EDR Retention

Estimated cost of Ransomware Attacks in 2021

\$20 Billion

Over 60%

of people never check to see if they were affected by a data breach

More Than Just Anti-Virus

Anti-Virus on your endpoint is a core requirement but it is just the beginning. Modern day threats and business demands require advanced detection engines for prevention of file and script-based threats. Additionally, efficient logging of all system activities for advanced forensics and threat hunting.
