

An All-Encompassing Security Service for Your Environment

The Digicel Business Protect Breach Detection Service (BDS) couples people & process with bleeding edge technology providing an enterprise-grade security solution. The service features real-time threat detection, NG-SIEM and response. Which delivers high fidelity alerts with context and the ability to remediate from our Security Operation Center (SOC).

More Than an Automated Security Tool

Digicel Business Protect provides a fully managed SOC leveraging our Breach Detection Service (BDS). BDS is a bleeding edge security service that combines manpower & skillset with an advanced AI Platform for a hyper paranoid solution designed to proactively hunt threats in their early stages.
